I certify that this is a report of the total payment received from this debtor/borrower. No late fees, finance charges or other charges have been deducted from the total amount received as payment from this debtor/borrower.

This payment advice represents the entire payment of the debtor and not just the attorney's fees we are allocating on our books. I understand that the 15% attorneys fees awarded by the courts on our judgment is the amount the state allows us to charge for attorneys fees on our loan and does not represent the commission we pay for collections to our attorney whether it goes to court or not.
